### PROFESSIONAL SUMMARY

IT Support and Network Operations professional with hands-on experience in first- and second-line support, NOC infrastructure monitoring, and network troubleshooting. Currently serving as a **NOC Operator** specializing in infrastructure health verification, server hardware monitoring, and virtualization management. Proficient in IBM Storage Manager, DELL OpenManage Enterprise, VMware vCenter, and ESXi host management. Experienced in LAN/Wi-Fi monitoring, backup verification, systems support, and incident escalation. Certified in CCNA, Ethical Hacking, and Network Troubleshooting with a proven track record of maintaining secure and efficient IT operations. Motivated to contribute to hybrid desktop, systems, and network operations.

---

### WORK EXPERIENCE

#### NOC Operator | XpandIT

*September 2026 – Present*

- Monitor and verify infrastructure health across IBM Storage Manager, IBM Storage Insights, and DELL OpenManage Enterprise platforms
  - Ensure all server hardware status is operational and resource groups remain alert-free
  - Verify vCenter and ESXi hosts online status; action notifications and warnings including guest disk space issues
  - Monitor VM health and backup infrastructure alarms to maintain system integrity
  - Review and action email notifications for timely incident response
  - Ensure all site backups and VM operations complete successfully
  - Maintain real-time communication with engineers and internal teams
-

## **LNOC Dispatcher | Huawei Technology (via Tensor Dynamic Solutions)**

*April 2026 – August 2026*

- Monitored network operations and site performance across multiple regions
  - Dispatched field technicians and escalated incidents to relevant technical teams
  - Coordinated incident resolution to meet SLA and KPI targets
  - Maintained real-time communication with engineers, vendors, and internal teams
  - Logged, updated, and managed tickets using network monitoring and service desk systems
  - Generated reports on outages, response times, and network performance
  - Supported network stability by ensuring timely response to critical incidents
- 

## **IT Technician & Help Desk Agent | GPLAT Solutions**

*February 2026 – April 2026*

- Delivered first-line technical support and help desk services to resolve hardware, software, and network issues for clients via phone, email, and remote access tools
  - Conducted site surveys and developed fibre pathway plans for building installations to ensure optimal infrastructure deployment
  - Utilized **Zabbix** and **GDMS (Grandstream Device Management System)** to proactively monitor network infrastructure, including SIPS networks, identifying outages and device failures
  - Logged and managed tickets with relevant stakeholders when network or device downtime was detected, ensuring prompt resolution
  - Diagnosed and troubleshooted IT incidents, ensuring timely resolution and user satisfaction
  - Documented support requests, solutions, and procedures to build a knowledge base for recurring issues
  - Collaborated with the IT team to escalate and resolve complex technical challenges
-

**IT Technician (WBE Internship) | Ekurhuleni East TVET College - Main Campus**

*January 2024 – August 2025*

- Delivered first and second-line support for hardware, software, user accounts, and network issues across campus
- Performed endpoint, desktop, and Active Directory administration
- Supported LAN and Wi-Fi troubleshooting, network monitoring, and switch configuration
- Assisted senior IT staff with authorized network configuration and incident escalation
- Verified backups, supported recovery procedures, and ensured compliance with IT policies
- Coordinated structured cabling activities and supported infrastructure deployments
- Maintained IT asset registers, SOPs, technical documentation, and classroom IT infrastructure

---

**EDUCATION**

**NCV (NQF Levels 2-4): Information Technology & Computer Science**

Ekurhuleni East TVET College | Completed 2024

---

**CORE TECHNICAL SKILLS**

**Tools & Platforms**

| Category       | Tools                                                                                                    |
|----------------|----------------------------------------------------------------------------------------------------------|
| Monitoring     | IBM Storage Manager, IBM Storage Insights, DELL OpenManage Enterprise,VMware vCenter, ESXi, Zabbix, GDMS |
| Service Desk   | ServiceNow, Zendesk, Freshservice                                                                        |
| Remote Support | AnyDesk, RDP                                                                                             |
| Network Tools  | Cisco Packet Tracer, Wireshark                                                                           |

## Networking & Infrastructure

- CCNA Routing & Switching
- LAN & Wi-Fi Monitoring and Troubleshooting
- Switch Configuration, VLANs, IP Addressing
- Firewalls, ACLs, Secure Wi-Fi Deployment
- Structured Cabling, Patch Panels, Cable Management
- Network Monitoring & SNMP Exposure

## Virtualization & Storage

- VMware vCenter & ESXi Host Management
- VM Health Monitoring
- Storage Infrastructure Monitoring (IBM & DELL)
- Backup Infrastructure Verification

---

## CERTIFICATIONS

| Certification                            | Institution              | Date       |
|------------------------------------------|--------------------------|------------|
| Cisco Certified Network Associate (CCNA) | Cisco Networking Academy | Dec 2024   |
| Ethical Hacker                           | Cisco Networking Academy | July 2025  |
| IT Essentials                            | Cisco Networking Academy | July 2025  |
| Introduction to Cybersecurity            | Cisco Networking Academy | March 2024 |
| Network Addressing & Troubleshooting     | Cisco Networking Academy | March 2024 |

---

## PROJECTS

### NOC Infrastructure Monitoring

- Monitor IBM Storage Manager and Storage Insights for enterprise infrastructure health
- Verify DELL OpenManage Enterprise component health
- Manage vCenter and ESXi host availability
- Ensure backup completion and VM health verification

### Campus Network Infrastructure Upgrade

- Installed and configured switches across three classrooms supporting 60+ workstations
- Performed structured cabling, patching, and physical network setup

### Secure Academic Network Implementation

- Designed and deployed a secure LAN and Wi-Fi network using firewall policies and ACLs
- Conducted network simulations using Cisco Packet Tracer prior to physical deployment

### Enterprise Network Configuration

- Configured 10+ routers and switches in Cisco Packet Tracer
- Implemented VLAN segmentation for security
- Set up DHCP and DNS services
- Configured ACLs for network security

### Portfolio Website

- Designed and built a personal portfolio using HTML, CSS, and JavaScript
